Systems Administration	Windows Server, AD, GPO, Hyper-V
Networking	Cisco, VPN, DNS/DHCP, monitoring
Customer Escalation	troubleshooting, recovery, vendor coordination
Migration Coordination	archive transfers, cutovers, validation
Documentation	runbooks, knowledge base, training material

EXPERIENCE

Senior Technical Support Manager

Feb 2021 – Present

Maven Imaging — Sarasota, FL

Tier II escalation and support management for healthcare technology environments. Work centers on customer troubleshooting, migration coordination, vendor handoffs, documentation, and keeping customer environments stable through support incidents and planned transitions.

- Coordinate customer migrations, legacy archive transfers, cutovers, and validation follow-up
- Support customer workstations, network connectivity, account access, and vendor application issues
- Troubleshoot licensing, workstation, networking, VPN, and hosted-service access issues across customer environments
- Document repeatable support procedures and maintain knowledge-base material for customers, field teams, and internal support
- Escalate service-impacting issues across customers, vendors, and internal teams with clear status updates and recovery steps

Healthcare IT Customer systems Windows workstations Hosted services

Migration coordination Hyper-V VPN Freshdesk

Systems Administrator

Apr 2014 – Feb 2025

ThinkTV (PBS Affiliate) — Dayton, OH

Concurrent with the start of the Maven Imaging role.

Supported network, server, workstation, and broadcast-adjacent infrastructure for a regional PBS affiliate environment. Work included Windows Server, Active Directory, virtualization, endpoint management, Cisco networking, monitoring, and user support in an always-on media operations setting.

- Supported Hyper-V virtualization and server consolidation for Windows Server workloads
- Administered endpoint management for Windows workstation fleets using SCCM-era tooling
- Maintained Cisco routing, firewall, and switching infrastructure with monitoring and troubleshooting
- Supported broadcast-related server and encoder infrastructure with escalation and maintenance as needed

Windows Server 2008-2016 Active Directory & GPO Hyper-V SCCM PRTG Cisco Avaya VOIP

IT Support Technician

Jun 2010 – Apr 2014

Dayton Technology Group (MSP) — Dayton, OH

Supported multiple MSP client environments across Active Directory, Group Policy, DNS/DHCP, server refreshes, user onboarding, documentation, and 24/7 monitoring with escalation to senior administrators when needed.

- Assisted with server refreshes and legacy Windows Server decommissioning
- Documented client networks, topology notes, runbooks, and recurring support procedures
- Onboarded users and provided practical training on business software, phone systems, and account access

Windows Server 2003-2012 R2 Active Directory Group Policy Avaya IP Office
